

## Appendix B

### Original Equipment Tire and Wheel Information for SS & Jaguar Cars

The following information is based on the best data available and is for use in judging. Some non-North American and International models may not be included. This information may be superseded either by the tire and wheel data contained in the Owner's Manual for a specific model Jaguar or by the Tire Recommendation Plate attached to the car. Recommendations for additions or corrections to this appendix are encouraged and may be sent to the Chairperson of the Judge's Concours Rules Committee (the address can be found in the Clubs, JCNA Committees Section of the *Jaguar Journal*). A copy of the page(s) of the applicable Owner's Manual, or a photo of the Tire Recommendation Plate, specifying the tire size and/or wheel description, must accompany all submissions.

See Owner's Manual for Exact Tire Specifications  
JCNA Concours Rule Book – 2025 Edition

**General:** Tires are considered expendable. Replacement tires must be the same (or equivalent) size and construction (bias/radial) as originally found on the car when delivered by the Jaguar factory or offered by Jaguar Cars as optional equipment. **See exceptions in Chapter VI.** In order to ensure that the car will maintain the proper stance and original appearance, replacement tires must maintain the same aspect ratio as the OEM. The size molded into the tire must be accepted as proof of currently exhibited size (example: 6.40 x 15 or 185 x 15). Sidewall or stripe/color or width is currently optional. Universal Tire Company, Lancaster, PA, British Wire Wheel, Fresno, CA or Coker Tire, Chattanooga, TN are sources for many of these hard-to-find tires.

**Notes:**

1. 4.75 x 18 tires deleted from manufacturer's listings in Oct.89.
2. 6.70 x 16 newly available from Dunlop.
3. In May 1963, Service Bulletin M.7 stated that Dunlop SP tires (a radial tire) are suitable for use on MK2 Jaguars; all MK2's may therefore be equipped with either bias ply or radial tires of the prescribed size.
4. As stated in the Jaguar Service Bulletin, M.15, November 1965, 185 x 15 tires are a proper replacement for Series 1 E-Type tires, thus, either 6.40 x 15 or 185 x 15 size tires are considered authentic for the Series 1 E-Type.  
As stated in the Jaguar Cars Spares catalogue, page 72, 185 x 15 tires are correct for the Series 2 E-Type and are considered authentic.  
(2025 AGM Administrative Clarification for the 2025 Concours Season)  
**Note:** At that time period, by default "185x15" tires were "80" series, that being the aspect ratio of the height of the sidewall in comparison to the width of the tread. "185/70x15" tires are Non-Authentic as the tire diameter and road height are not authentic with the keeping of the car. (2025 AGM Administrative Clarification for the 2025 Concours Season)
5. During 1972-1974, the tire industry experienced near-chaos as it changed industry standards and nomenclature. The original equipment Dunlop ER7015VR is available through several manufacturers in either the original size or equivalent: P205/70VR15.
6. For cars manufactured, beginning in the late 1990's, there is a sticker on the driver's door jamb specifying the correct tire size as specified by the manufacturer.

Additional vintage tire information was provided by Phillip Pollock of Vintage Tire Supplies Ltd., Middlesex, England. Updated and reformatted for the 1997 6th Reordered Edition. Tire and wheel information listed after model year 2001 updated by Jaguar Cars. Reformatted and edited by Stew Cleave and Dick Cavicke, with the help of the JCC, Gregory Andrachuk, and Doug Dwyer for Edition 8.1 per the 2004 AGM.

**TIRE SPEED RATINGS** (The following is provided courtesy of The Tire Rack [www.tirerack.com](http://www.tirerack.com))

Over the years, tire speed rating symbols have been marked on tires in one of the three ways shown in the following examples:

**225/50SR16; 225/50SR16 89S or 225/50R16 89S**

Early tires had their speed rating symbol shown "within" the tire size, such as **225/50SR16**. Tires using this designation were **not** to have been produced after 1991:

**225/50SR16** - 112 mph; **225/50HR16** - 130 mph; **225/50VR16** - in excess of 130 mph.

Beginning in 1991, the speed rating symbol denoting the fixed maximum speed capability was shown only in the speed rating portion of the tire's service description, such as **225/50R16 89S**. Common speed rating symbols, maximum speeds and typical applications are shown below:

**N** 87 mph, Temporary Spare Tires

**P** 93 mph

**Q** 99 mph, Studless & Studdable Winter Tires

**R** 106 mph, H.D. Light Truck Tires

**S** 112 mph, Family Sedans & Vans

**T** 118 mph, Family Sedans & Vans

**U** 124 mph

**H** 130 mph, Sport Sedans & Coupes

**V** 149 mph, 240 Sport Sedans, Coupes & Sports Cars

When **Z**-speed rated tires were first introduced, they were thought to reflect the highest tire speed rating that would ever be required, in excess of 149 mph. While **Z**-speed rated tires are capable of speeds in excess of 149 mph, how far above 149 mph was not indicated. That ultimately caused the industry to add **W** and **Y** speed ratings to identify tires that met the needs of new vehicles that have extremely high top-speed capabilities:

**W** 168 mph, Exotic Sports Cars;

**Y** 186 mph, Exotic Sports Cars.

While a **Z**-speed rating still often appears in the tire size designation, such as **225/50ZR16 91W**, the **Z** in the size signifies a maximum speed capability in excess of 149 mph; the **W** in the service description indicates the tire's 168 mph, maximum speed.

**225/50ZR16** in excess of 149 mph; **205/45ZR17 88W** 168 mph; **285/35ZR19 99Y** 186 mph.

Recently, when the **Y**-speed rating indicated in the service description is enclosed in parenthesis, such as **285/35ZR19 (99Y)**, the top speed of the tire has been tested in excess of 186 mph, indicated by the service description as shown below:

**285/35ZR19 99Y** 186 mph; **285/35ZR19 (99Y)** in excess of 186 mph.
